WELL BAND

- Protects cuts from dirt and other **germs**
- Seals the area which will prevent the skin from being "rubbed" open during daily activities, it is **flexible**,
- Well band include an **antiseptic**, so you do not have to worry about using other creams to prevent infections
- Well band provide an added **pain reliever** to sooth a painful cut

WELL BAND

- Completely **water-proof**, meaning that they are a much better option if you are planning to swim, or be around water in general
- Allows you to continue your regular daily activities without the worry of replacing a bandage, or having to deal with the visual appearance of wearing one
- **Breathable**, so the seal will still allow the cut to heal
